Description

**TOTAL BODY CROSS TRAINER**

A commercial high-end cross trainer with the patented Arc Trainer design that gives fast fitness results. Train for strength, power and weight

loss on one machine. The Cybex 770AT Arc Trainer® offers broad incline and resistance ranges to do the work of three machines in one. At the lower incline levels, the “glide” is a cross-country skier. In the mid-range levels, the motion is a “stride” (like an elliptical except with proper positioning). At the high levels, it’s the “climb” of a stepper or climber. Research shows that the Cybex Arc Trainer burns more calories than any other cross trainer or elliptical tested.

## USER-FRIENDLY TECHNOLOGY

The innovative Muscle Map™ of the standard LED display gives users the power to visually target individual muscle groups and take full advantage of the near limitless settings. The CardioTouch™ touchscreen display offers a single command center for every exercise workout and entertainment control. Your members can easily set up a workout, charge an iPod® or iPhone®, scroll through playlists, albums, artists, podcasts, and more. Optional technology features include the embedded MYE wireless audio receiver and the E3 View high definition monitor which offers three viewing modes on a 15.6" embedded display.

## SPECIFICATIONS
