Description

The CS2.5 provides a super smooth, low impact, full body workout. It' unique, linear pedal path minimizes hip rotation and knee stress; all the while toning and shaping every muscle in the body. The semi-recumbent design places your feet out in front of you rather than directly below, improving circulation. This design allows for a wide, comfortable seat and ample back support. The CS2.5 makes exercise effective and fun; the way it's supposed to be.
